MORTARS, ADHESIVES AND PLASTERS

SHELL MATERIALS

ADHESIVE MORTAR

The ORTNER adhesive mortar "Das Original" 0 – 2 mm is a hydraulically-setting, grey mortar, meant for ceramic and fireclay products. For use in areas exposed to the temperatures up to 1000 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Adhesive mortar	OR110-20	Graining 0 – 2 mm	1 sack = 20 kg, 1 palette = 48 sacks

* Reduction liquid for adhesive mortar "Das Original" and adhesive mortar "Crème" see page 12

ADHESIVE MORTAR "CRÈME"

The ORTNER adhesive mortar "Crème" 0 – 1,2 mm has the same features and application as the ORTNER adhesive mortar "Das Original". Additionally this white mass can be used as mortar and putty. For use in areas exposed to the temperatures up to 1000 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Adhesive mortar Crème	OR110CR	Graining 0 – 1,2 mm	1 sack = 20 kg, 1 palette = 48 sacks

* Reduction liquid for adhesive mortar "Das Original" and adhesive mortar "Crème" see page 12

PRESSURE-SENSITIVE ADHESIVE

The ORTNER pressure-sensitive adhesive is a universal adhesive mortar for tiled stove and chimney constructions, for constructions, smoothing and spackling. Ideal for the shells in lightweight construction. For use in areas exposed to the temperatures up to 600 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Pressure-sensitive adhesive	OR115	Graining 0 – 1,2 mm	1 sack = 20 kg, 1 palette = 48

CONSTRUCTION MATERIALS

MORTAR

Mortar is a ceramically-setting, ready to use mortar to be used with construction materials in traditional tiled and accumulation stoves construction. **For use in areas exposed to the temperatures up to 1200 °C.**

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Mortar	OR130-20	Fine graining (beige)	1 sack = 20 kg, 1 palette = 48 sacks

HK MORTAR

The **ORTNER HK mortar 0 – 1,2 mm** is a hydraulically setting and ceramically-setting mortar, for fixing the fireclay elements in areas **exposed to the temperatures up to 1200 °C.**

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
HK mortar	OR160	Graining 0 – 1,2 mm,	1 sack = 20 kg, 1 palette = 48 sacks

TIP

SPECIAL MORTARS

CAST FIRECLAY MASS

Fireclay mass for individual casting of bearing and non-bearing elements, construction bases inside the firing chambers as well as elements for constructing walls and the shell in the warmth conducting areas **exposed to the temperatures up to 450 °C.**

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Cast fireclay mass	OR120	Graining 0 – 5 mm	1 sack = 25 kg, 1 palette = 42 sacks

NEW REFRACTORY MORTAR

The **ORTNER refractory mortar** is a powdered, chemically-setting repair mortar. The mortar is suited for quick corrections as well as permanent reparations of the defect firebox areas exposed to the max. temperature of up to 1.200 °C. The **ORTNER refractory mortar** is to be mixed with the addition of water.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Refractory mortar	OR9934	Repair mortar; powder	1 can = 1 kg; 1 carton = 6 cans

REPAIR MORTAR / PHOSPHATE BONDED

For special uses within problem zones expose to high temperatures. The mortar is made up of 2 ingredients (mortar and phosphate). The ingredients create a fast setting repair mass that requires no drying. The combustion chamber can be used 2 hours after the application of the repair mortar. For areas **exposed to the permanent temperatures up to 1700 °C.**

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Repair mortar	OR9932-25	Graining medium = 0 – 4 mm	1 bucket = 2,5 kg + 1 bottle = 0,6 l
Repair mortar	OR9932	Graining medium = 0 – 4 mm	1 bucket = 5 kg + 1 bottle = 1,2 l

STORE FROST PROTECTED!

NEW REFRACTORY CONCRETE 2200

The refractory concrete is suited for producing firebox parts exposed to the max. temperatures of up to 1.200 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
FB 2200	OR-FB2200	pulverulent	bucket = 20 kg

STOVE PLASTERS

FREE-STYLE STRUCTURAL PLASTER

The **ORTNER** free-style structural plaster is a white thin film plaster of extraordinary adhesiveness for creating thin and thick layers. To be used in thin film technique as well for forming ledges and structures of max. 50 mm. For areas exposed to the temperatures up to 200 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Free-style structural plaster	OR151	Graining 0 – 0,5 mm	1 sack = 20 kg; 1 palette = 48 sacks
Free-style structural plaster	OR150-20	Graining 0 – 1 mm	1 sack = 20 kg; 1 palette = 48 sacks

STOVE PLASTER

The extraordinary adhesive white thin-film is available in graining 0 – 0,5 mm and 0 – 1 mm. The **ORTNER** stove plaster enables free formation of the outer heating surface. For use in areas exposed to the temperatures up to 200 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Stove plaster	OR10-05-20	Graining 0 – 0,5 mm	1 sack = 20 kg; 1 palette = 48 sacks
Stove plaster	OR101-20	Graining 0 – 1 mm	1 sack = 20 kg; 1 palette = 48 sacks

ADHESIVE MORTAR "CREME"

The **ORTNER** adhesive mortar "Creme" 0 – 1,2 mm has the same features and application as the **ORTNER** adhesive mortar "Das Original". Additionally this white mass can be used as mortar and putty. For use in areas exposed to the temperatures up to 1000 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Adhesive mortar "Creme"	OR110CR	Graining 0 – 1,2 mm	1 sack = 20 kg; 1 palette = 48 sacks

* Reduction liquid for adhesive mortar "Das Original" and adhesive mortar "Crème" see page 12

BOND AND KEY COAT

The **ORTNER** bond and key coat is a pure white thin-film plaster to be used for the heated surfaces in areas exposed to the temperatures up to 150 °C. Maximal layer thickness is 4 mm.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Bond and key coat	OR15	Graining 0 – 0,5 mm	1 sack = 20 kg; 1 palette = 48 sacks

ADHESIVE PLASTER

The **ORTNER** adhesive plaster is a hydraulically Winding plaster of the undetectable graining, that has been created especially for the Leeds of the modern oven-setters. For use in areas exposed to the temperatures up to 200 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Adhesive plaster	OR100	Finest graining	1 sack = 25 kg; 1 palette = 42 sacks

FRESCO-SURFACE

FINE-GRAINED MORTAR

The **ORTNER** fine-grained mortar is a thin-film fine grained mortar for creating very smooth layers. For use in areas **exposed to the temperatures up to 150 °C**.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Fine-grained mortar	OR100-0110	Graining 0 – 0,02 mm	1 sack = 10 kg, 1 palette = 80 sacks

FRESCO

Spackling paste **FRESCO** is a mortar for the outer surface of tiled stoves, chimneys and plastered walls, available in a variety of colors. Should the desired color not be in our assortment, it is possible to mix different colors with each other. Always use the mixing liquid! For use in areas **exposed to the temperatures up to 150 °C**.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Spackling paste FRESCO	OR100-015	White	1 bucket = 2 kg
Spackling paste FRESCO	OR100-02	Black	1 bucket = 2 kg
NEW Spackling paste FRESCO	OR100-03	Slate brown	1 bucket = 2 kg
Spackling paste FRESCO	OR100-04	Eggshell	1 bucket = 2 kg

Spackling paste FRESCO	OR100-18	Yellow 2	1 bucket = 2 kg
Spackling paste FRESCO	OR100-19	Orange 2	1 bucket = 2 kg
Spackling paste FRESCO	OR100-20	Blue 1	1 bucket = 2 kg
Spackling paste FRESCO	OR100-21	Green 1	1 bucket = 2 kg
Spackling paste FRESCO	OR100-22	Green 6	1 bucket = 2 kg
Spackling paste FRESCO	OR100-23	Violet 1	1 bucket = 2 kg
Spackling paste FRESCO	OR100-24	Anthracite	1 bucket = 2 kg
Spackling paste FRESCO	OR100-25	Slate grey	1 bucket = 2 kg
Spackling paste FRESCO	OR100-26	Concrete Grey	1 bucket = 2 kg
NEW Fresco Design basic kit	OR-SA002000	Consists of: 2 bags of smoothing plaster; 1 unit of reducing agent (5L); Fresco: white, black slate brown, slate grey, sienna and shell (a bucket each)	2 bags, 1 canister 6 buckets a 2 kg

MIXING LIQUID

Reduces the abrasibility of the **ORTNER** seams, Fresco and paints.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Mixing liquid	OR900-5	1 canister	5 liters
Mixing liquid	OR900	1 canister	10 liters

STORE FROST PROTECTED!

* = special color, available only on order.

** = **ORTNER** pouring aid; page 50

REINFORCEMENTS

The ORTNER reinforcements are temperature resistant, extensive layer for absorption of stretching trains, which despite multiple layering and proper bracing, might affect even the stove's surface.

FIBERGLASS GRID

... for the shell together with free-style structural plaster, adhesive mortar "Creme", bond and key coat, stove mortar and spackling paste Fresco.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Glass fiber grid	OR972	6 x 6 mm, tight, trick	1 reel = 50 m2; 5,5 kg

FIBERGLASS SILK

Optional for shells together with finishing plaster.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Fibreglass silk grid	OR973	very tight	1 reel = 20 m2; 1,5 kg

TEXTILE WALLPAPER

Adhesive plaster on textile wallpaper.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Textile wallpaper	OR960	thick	1 reel = 50 m2; 6 kg

PUTTIES FOR TILED STOVES

PUTTIES FOR TILED STOVE

Mass of extended adhesion and exceptional fiber reinforcements, developer especially for the tiled stoves. In the ORTNER assortment there are the paints of the colors of the putties. Exposed to the temperatures up to 150 °C. Colors marked with the letter „A“ must be tempered exclusively by means of the reducing agent.

READY STOVE-SETTING MATERIALS

CAST FIRECLAY BOARDS*, ELBOWS, RADII BOARD AND PILASTER STRIPS

The ORTNER fireclay products are perfect for casing the accumulation core in the hypocaust system: fast accumulation and conductivity of energy radiating from the inner accumulator thanks to heightened heat conductivity – designed for the load-bearing systems with a heavy core. For use in areas permanently exposed to the temperatures up to 450 °C. For fixing one can use adhesive mortar, adhesive mortar Crème or the ORTNER pressure-sensitive adhesive or by means of the ORTNER fast montage screws.

CAST FIRECLAY

RADII *

TIP

CAST FIRECLAY BOARD VIVEG

The ORTNER cast fireclay board VIVEG is an elastically cast fireclay board meant for constructing a stove shell of any shape. Integrated reinforcement enables free forming. For fixing one can use adhesive mortar, adhesive mortar Crème or the ORTNER pressure-sensitive adhesive.

STOVE BOARDS, ELBOWS AND RADII

STOVE BOARDS, ELBOWS AND RADII

The ORTNER stove boards have been designed for the requirements of the NEW housing technology. Due to their exceptional accumulation, the heat is accumulated more regularly and longer. The ORTNER stove boards guarantee low surface temperatures and longer accumulation time, which are needed in **energy saving and passive houses**. For fixing one can use adhesive mortar, adhesive mortar Crème or the ORTNER pressure-sensitive adhesive. Recommended for use in areas **exposed to the temperatures up to 350°C**.

ACCUMULATION BOARDS

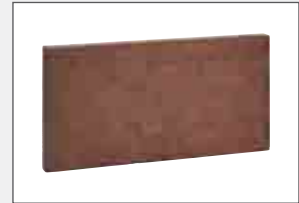

ACCUMULATION BOARD*

NEW PRICE

Accumulation board is meant for use as an additional heat accumulator for metal heating inserts. For fixing one can use adhesive mortar, adhesive mortar Crème or the ORTNER pressure-sensitive adhesive.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Accumulation board	OR607	LxHxB 600 x 300 x 40 mm	1 pc. = 18,5 kg, 1 palette = 36 pcs.

* Accumulation board must not be used for constructing shells

SPECIAL CONSTRUCTION ELEMENTS

FIRECLAY LINTEL BEAM

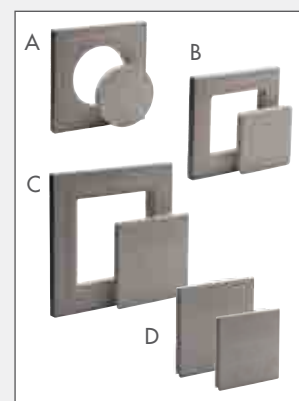

The ORTNER fireclay lintel beam is a support for openings on the inside and the outside of the hypocaust (excl. the combustion chamber) and guarantees the optimal weight distribution of the building elements. The static load-bearing capacity is enabled by an integrated galvanized rebar cage. For fixing one can use adhesive mortar, adhesive mortar "Crème" or the ORTNER pressure-sensitive adhesive.

UNIVERSAL BOARDS, ELBOWS AND RADII

Universal board is a waterproof, purely mineral construction board meant for constructing plastered surfaces in lightweight construction, resistant to temperatures up to 70°C.

The reduced thickness of 12,5 mm enables constructing lightweight plastered surfaces. The elements are double reinforced and are distinguished by their durability. Not suitable for statically loaded coverings. For fixing one can use adhesive mortar, adhesive mortar Crème or the ORTNER pressure-sensitive adhesive or the ORTNER fast montage screws.

UNIVERSAL BOARDS

ORTNER INSIDE COMBUSTION CHAMBER

The ORTNER Grundöfen (GO = basic stoves) and the ceramic heat accumulating system are the core of the heat accumulating tiled stove! Flexible, fast and clean installation as well as the variety of possibilities of connecting a GO and the heat accumulating system are but a few of advantages of the modern ORTNER tiled stove!

The ORTNER GO fulfills all the low heat load requirements of the low-energy houses and so can be adjusted to and designed for each house type.

Moreover, the GOs comply with the national regulations §15a as well as the regulations of the Emissions Protection Ordinances (BIMSchV level 2) and of the Swiss Pure Air Act (Luftaltheverordnung; LRV). The ORTNER GOs –bring therefore not only cozy and economic warmth into one's home, but also contribute to environmental protection in a special way.

Characteristic for the ORTNER GOs is the high portion of ceramic heat accumulating mass. At least 80% of the GO consists of the accumulating mass, which allows the stove to become accumulating system in itself.

WHY ORTNER COMBUSTION CHAMBERS

-  Stove = Accumulation mass
-  ORTNER basic stove consists of min. 80% aus ceramic accumulation mass
-  Ecological (lowest emissions standards)
-  Best accumulation characteristics
-  Maximum accumulation on minimum space utilization
-  qualified for lower-energy houses
-  Changable combustion chamber parts
-  Accurate planing with less material cull
-  assured rapid setting
-  dust-free setting
-  100 % Austrian Quality

GO8T

The ORTNER GO 8T is the first ceramic tunnel oven (with glass on both sides you can see through it) in the ORTNER range and fulfills the requirements of the modern oven setting. Two sets of GO doors allow the impressive sight of flaming fire from, for instance, two separate living areas.

- Amount of wood: 5 kg wood
- Total weight ca. 227 kg
- 2 sets of GO doors with double glazing
- Frame for the perfect installation of the GO body
- Automatic or manual control possible

Despite the two glasses, in the model we have accomplished bringing the heat accumulating ability in harmony with optical added-value! An accomplishment it is, as until now, no ceramic heat accumulating tiled stove has been manufactured as a tunnel.

"Flexible"
More space thanks to multiple possibilities of air supply connection.

GO8

The basic oven (Grundofen) 8 in two different variants connects the exceptional heat accumulating abilities of the ORTNER basic ovens (Grundöfen) with minimal emissions and extraordinary durability!

The oven has been developed with regard to the decreasing heating needs of new buildings. The installation of the compact basic oven is the trusty modular construction. Inside the combustion chamber the cooling air supply guarantees the optimal combustion. The ceramic heat accumulating system in the form of KMS 240 or 300 can be mounted onto the top, 360° rotatable KMS cover.

- Amount of wood: 8 kg wood
- Total weight 222 kg
- GO doors with double glazing
- Frame for perfect installation of the GO body
- Automatic or manual control possible

"Flexible"
More space thanks to multiple possibilities of air supply connection.

GO15 Messwerte	CO (mg/MJ)	NOx (mg/MJ)	OGC (mg/MJ)	Staub (mg/MJ)	η (%)
	229	102	34	15	92

GO15

The ORTNER basic oven (Grundofen) 15 has been tailored to the newest emission requirements and optimized in the area of combustion technology. The installation of the compact basic oven is the trusty modular construction. Inside the combustion chamber the cooling air supply guarantees the optimal combustion. The ceramic heat accumulating system in the form of KMS 300 can be connected on the side.

- Wood amount: 15 kg wood
- Total weight ca. 450 kg
- GO doors with double glazing
- Frame for perfect installation of the GO body
- Automatic control

SAFETY WITH ORTNER GMBH

ORTNER Inside is planned individually by means of the ORTNER calculation program. By using the program developed by independent research institute the safety of the optimal function is guaranteed.

AWARDED WITH THE AUSTRIAN ECOLABEL

Emission low basic oven (Grundofen) with optimal energy yield!

The ORTNER INSIDE basic ovens (Grundöfen) have been awarded the Austrian Ecolabel, which certifies that the emission- and dust-low ORTNER INSIDE basic ovens comply with the Directive UZ 37.

ORTNER COMBUSTION CHAMBERS

ORTNER GOR44 – WITH SMALL DOORS

NEW

Maximal efficiency on minimal space. Due to the direct connection of the accumulation core or the stove cover with the KMS ceramic accumulation module (p. 39), we offer the flexibility of the various modular elements developed for Rundofen. Sophisticated whirl technology guarantees a complete, and as a result, clean combustion. The height of the attached basic frame can be regulated; there is automatic and manual control available.

CHANGEABLE COMBUSTION CHAMBER PARTS

CERAMIC ACCUMULATION MODULE

KMS 300

CERAMIC ACCUMULATION MODULE

Chimney pipe system developed for the quality aware oven-setters – with unmatched heat conductivity and accumulation. Thanks to various connection possibilities and big choice of products, there is no limit to the designing possibilities. We have a special service for you – support in designing your KMS system.

Attention: for gluing and mounting the KMS module, use the Orfix 10 glue (p. 12)

INSULATING MATERIALS

THE ISOBOARD INSULATING BOARDS

ISOBOARD T-700

Lint and fiber free thermal insulation boards made of natural raw material vermiculite and binding agents. Used for insulating tiled stoves and fireplaces.

For use in areas permanently exposed to the temperatures up to 700 °C.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Isoboard 500 mm	OR40230K	750 x 500 x 30 mm	box = 4 pc. / 1,5 m2
Isoboard 500 mm	OR40230	750 x 500 x 30 mm	palette = 60 pc. / 22,5 m2
Isoboard 1.000 mm	OR40231	750 x 1.000 x 30 mm	1 pc. = 0,75 m2
Isoboard 1.000 mm	OR40231	750 x 1.000 x 30 mm	palette = 30 pc. / 22,5 m2

ISOBOARD HD 1200

NEW

Fiber free thermal insulation boards made of natural material vermiculite and binding agent. Can be used as insulation in tiled-stove and chimney construction. Maximal allowable temperature is 1100 °C

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Isoboard HD 1200	OR40233	610x1000x30 1100°C	1Stk / 60 Stk

THE ISOBOARD INSULATING BOARDS GLUE

Quartzite-bound, fireproof glue resistant to temperatures up to 110 °C for joining highly absorbent surfaces, such as the ORTNER Isoboard insulation boards or other light construction materials.

ARTICLE	ARTICLE NR.	SPECIFICATION	AMOUNT
Isoboard glue	OR9903	Fireproof glue up to 1100 °C, paste	bucket = 3 kg
Isoboard glue	OR9903-1	Fireproof glue up to 1100 °C, thick liquid	plastic bag = 1 kg

TERMS AND CONDITIONS

- 1. General:** The following terms and conditions are valid, unless expressly agreed in written form with ORTNER, for all the present and future purchases. The divergent terms or oral agreements are valid only when confirmed by ORTNER in writing. No right can be derived from printing or other errors. All the weight, size, color, price, service and similar specification information stated in catalogues, leaflets, newsletters, advertisements, images and price lists are approximations and only binding for ORTNER when they constitute, in writing, purchase conditions of an ordering transaction. The ORTNER terms and conditions are valid also when the buyers name their own divergent terms, which are not expressly discounted by ORTNER. Orders are only binding to ORTNER by confirmation in writing; ORTNER is even in case of the order acceptance allowed to withdraw from the delivery contract in case of serious doubt that the buyer might not fulfill his contractual obligations.
- 2. Packaging:** The packaging is to the discretion of ORTNER with all due diligence. Special requests and special packaging debit the buyer. ORTNER GmbH is due to the license partnership with ARA (Nr. 16711) not obliged to recover the packaging material; ARA guarantees environmentally friendly disposal. Standardized transport equipment (palettes, barred boxes etc.) are excluded. In case those are not returned, ORTNER GmbH debits the charges to the buyer.
- 3. Shipping:** Up from warehouse shipping takes place always at the risk of the buyer. ORTNER is not liable for damaged or lost goods. All shipping regulations are observed. Any insurance require agreement and debits the buyer.
- 4. Retention of title:** Pending full payment the goods remain owned by ORTNER. By processing the goods with other goods owned by the buyer, they do not acquire the ownership of the new product, but rather performed the processing for ORTNER. In case of the processing of the goods by means of other goods owned by the buyer or goods bought under proviso, ORTNER acquires the sole ownership of the processing material. In case the goods are processed by means of other goods bought under proviso, ORTNER acquires co-ownership of the new product in the relation of value of the goods to the value of the ready, new product. In case of the selling of the goods, the buyer transfers all the claims they have against their customers, and commit themselves to provide all the invoices of the goods with a cession note, which clearly states that all the payments, with full discharge of debtor, can be done exclusively to ORTNER. The buyer is obliged to inform ORTNER immediately of all the third party's proceeding for access to goods bought under proviso.
- 5. Terms of delivery:** The stated delivery periods are non-binding and are to be regarded as approximations. Delivery periods start after clarification of all the technical and mercantile delivery conditions. For lack of special agreements, ORTNER is entitled to partial deliveries. Unpredictable obstacles of any kind and cases of force majeure entitle ORTNER to adequately prolong the delivery periods or to withdraw from delivery. Withdrawal from the contract on the part of the buyer is only possible in case the buyer allowed ORTNER a reasonable period of grace without result. Claims for damages due to late, not executed or only partial deliveries are excluded.
- 6. Prices:** All the prices are quoted by ORTNER ex work. Unless otherwise agreed, charged are the prices valid on the delivery day. The statutory value added tax shall be indicated separately.
- 7. Payment:** In case of first purchase the delivery only against advance payment. The whole amount is due within 30 days of invoice date in full, or with 2% discount within 14 days. Until further notice ORTNER grants 2% discount on cash payments for pick up goods. In special cases, ORTNER reserves the right to demand advance payment adequate to the extent of the order. Checks and bills of exchange are accepted only in lieu of payment. Credit notes are only granted under provision of payment and on the payment day. All the coast, fees, interests and charges connected to the redemption and discounting of all the securities debit the buyer. ORTNER is entitled to refuse the acceptance of bills of exchange and checks without giving reasons.
- 8. Delay in payment:** Shall the date on which the payment is due be exceeded, ORTNER is entitled to charge 2% above current account interest rate plus value added tax. Moreover, all legal costs are debited to the buyer.
- 9. Warranty:** Warranty claims are to be made immediately after their discovery, but not later than after 8 days after the reception of the delivery. The buyers' warranty claims are so restricted, that ORTER is entitled to be extricated from the claims, by cancelation the contract or appropriate price reduction by exchange of the defective part against one free of defects within a month. The warranty claim expires at the latest one month after its rejection by ORTNER. All further damage claims, especially compensation for indirect damage, are generally excluded.
- 10. Returns:** The buyer is not entitled to return goods properly delivered by ORTNER. The return is only possible in original packaging after ORTNER's agreements and must be delivered carriage paid. Taking back is subject to a handling charge of 10% of net value, yet not less than 12 EUR. Custom made or used materials cannot be returned.
- 11. Data protection:** The buyer is aware that the whole ORTNER accounting system is carried out with the aid of computer technology. Under consideration of the federal law of 18.10.1978, BGBl. 565 (Data Protection Act), acc. to the §§ 17 and 18 of the Act, the buyer declares their expressed acceptance of storage and processing of the necessary data between ORTENR and its customers, as well as of the transmission of the data, as far as it does not concern either private or family lives of the customers, to the third parties.
- 12. Jurisdiction place of performance:** The court of jurisdiction for all legal disputes arising from the contractual relationship is St. Pölten; Austrian law applies exclusively, also in case of those Terms and Conditions.
