Hi Richard, Norbert and Jerry,

Thanks again for publishing the contraflow heater info.

Here are some pictures of my home and a large heater I have build according to your MHA Heater Portfolio in it's center.

It has served last (first) winter already as a primary (just and only) heating source and we love it. Specially my wive, who is using the bake oven permanently during heating season.

It is most likely the first one in this country with a bake oven.

All the best to you

Jan Jurcik
