Hello Norbert,

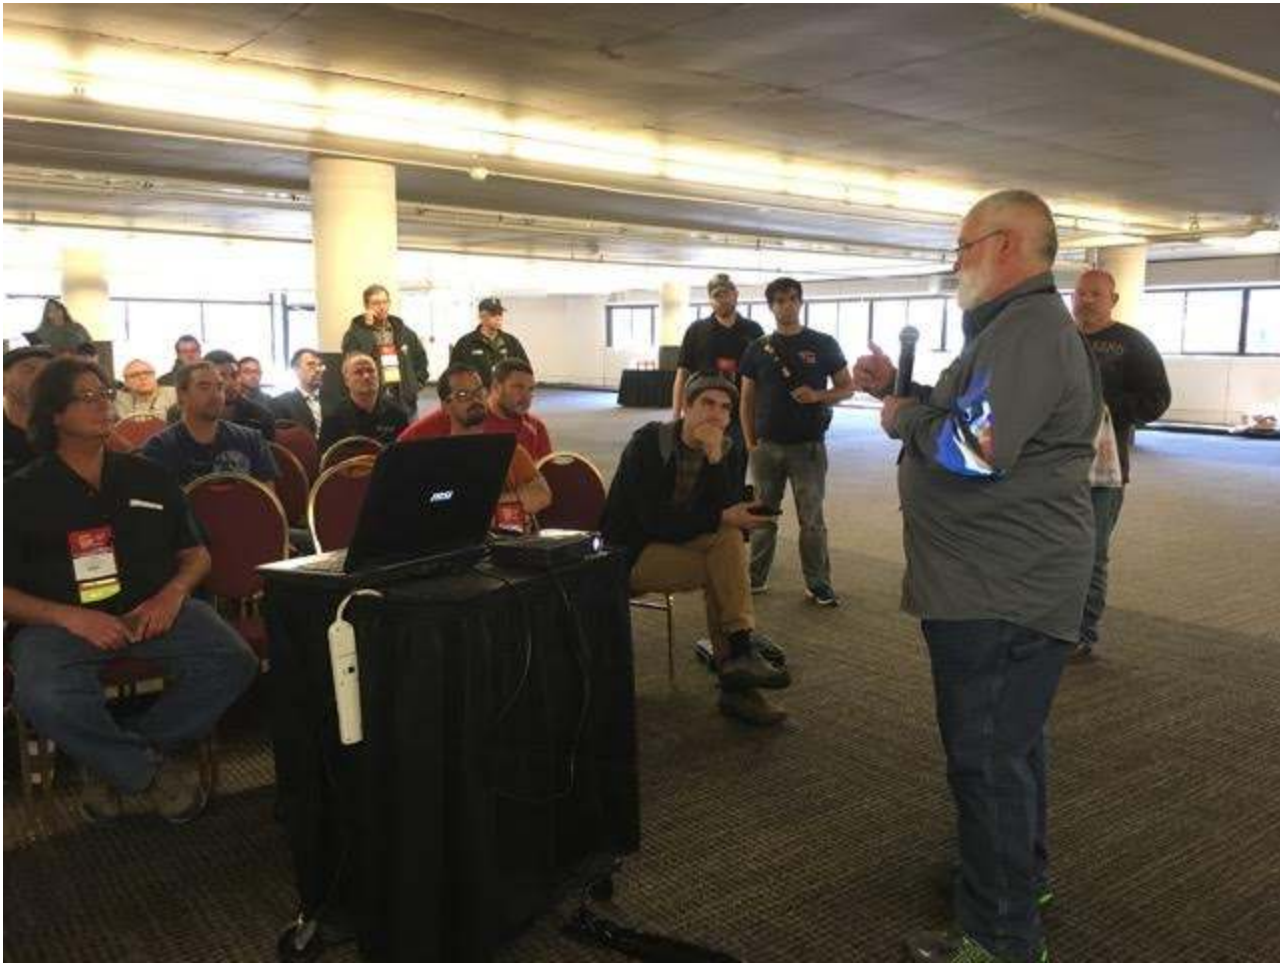

Chris Prior, Max Edleson and I gave a couple of presentations on masonry heaters yesterday at the 2018 National Chimney Sweep Convention in Portland (1. Functional principles, 2. Maintenance). Thanks to Chris' popularity we had over 100 sweeps attend to classes (90 minutes ea.).

I drove to the warehouse this morning to check on the status of the TU1000T/50 interior stone pallet that was not sent to Portland. I found that it is in the warehouse and that it is properly labeled. That means that I inadvertently by mistake sent the wrong pallet. I can't believe that I was so careless but I do have to take total responsibility for the mistake. I hope you will somehow be able to use what you have for the show display.

Doug
